	, ating applies	
Brand	Macna	
Model	EPI Nighteye	
Туре	Jacket - Textile	
Date purchased	25 May 2021	
Sizes tested	XL and 2XL	
Test garment gender	Male	
Style	Tourer	
RRP	\$359.00	
Test Results Summary	Rating	Score
MotoCAP Protection Rati	ng 🛧	23.6
Abrasion	1/10	0.76
Burst	10/10	1210
Impact	4/10	25.7
MotoCAP Breathability R	ating 🖌	0.109
Moisture Vapour Resistar	nce -	143.0

This MotoCAP safety rating applies to:

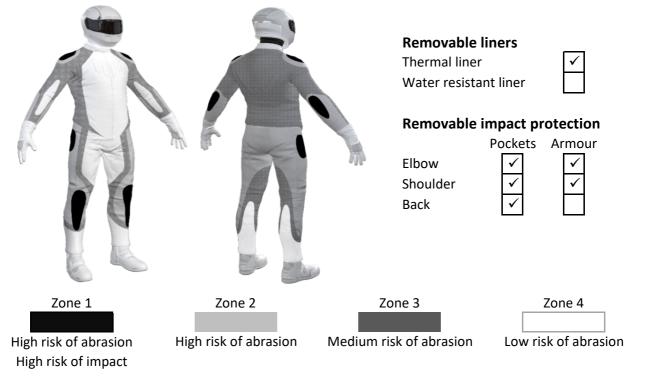

This garment is fitted with impact protectors for the elbows and shoulders. A pocket is provided for an aftermarket back protector. Replacing the elbow and shoulder armour with higher performing impact protectors would improve the protection levels of this garment. There are zipped vents in the chest, and mesh panels are located in the back to allow controlled airflow movement through the garment. The breathability rating is based on tests of the garment's materials when all vents are closed. The breathability of this product may be better when the vents can be opened. Breathability was measured without the removable thermal liner installed.

26.1

1/10

## **Abrasion Resistance**

The jacket was tested for abrasion resistance in accordance with MotoCAP test protocols. The diagram below is a visual indication of the likely abrasion performance of the materials in each zone calculated from the data in the table below. The colour coding is based on the worst performing material in each zone.

Abrasion Resistance Performance

Abrasion rating	1/10
Abrasion score	0.76

Determining Criteria	Area	Good	Acceptable	Marginal	Poor
High abrasion risk	Zone 1 & 2	> 5.6	3.0 - 5.6	1.3 - 2.9	< 1.3
Medium abrasion risk	Zone 3	> 2.5	1.8 - 2.5	0.8 - 1.7	< 0.8
Low abrasion risk	Zone 4	>1.5	1.0 - 1.5	0.4 - 0.9	< 0.4

**Individual Abrasion Resistance Results:** - The table below shows the test results for time to abrade through all layers of the materials. Calculated for each sample by Zone, type and area coverage of each material as a proportion of that Zone. Abrasion times are capped at a maximum of 10.00s.

Zone 1 & 2	Coverage (%)	Sample 1	Sample 2	Sample 3	Sample 4	Sample 5	Sample 6	Average
Material A	100%	0.84	1.04	0.89	1.39	0.66	0.44	0.88
Zone 3	Coverage (%)	Sample 1	Sample 2	Sample 3	Sample 4	Sample 5	Sample 6	L_ Average
Material B	30%	0.59	0.62	0.32	0.50	0.52	0.35	0.48
Material C	70%	0.43	0.43	1.00	0.63	0.47	0.75	0.62
Zone 4	Coverage (%)	Sample 1	Sample 2	Sample 3	Sample 4	Sample 5	Sample 6	Average
Material B	15%	0.59	0.62	0.32	0.50	0.52	0.35	0.48
Material C	85%	0.43	0.43	1.00	0.63	0.47	0.75	0.62

# Abrasion time for each test (seconds)

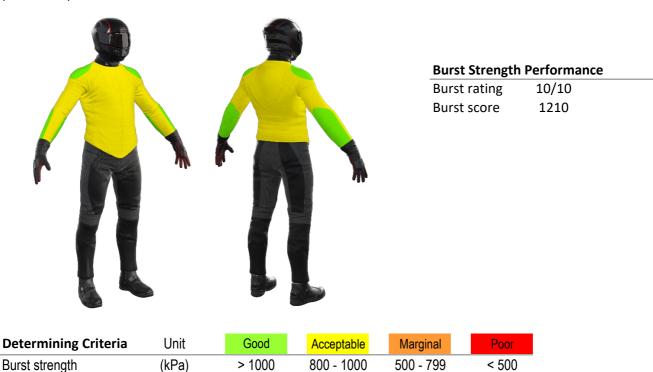

#### Details of materials used in jacket

Material A	Heavy woven fabric shell with water-resistant inner liner
Material B	Reflective coated woven fabric shell with water-resistant inner liner
Material C	Woven fabric shell with water-resistant inner liner

## **Burst Strength**

The jacket was tested for burst strength in accordance with MotoCAP test protocols. The diagram below illustrates the burst strength results in terms of the likely performance of the garment in an impact and is a pictorial representation of the data from the table below.

**Individual Burst Strength Results:** - The table below shows the burst pressure in kilopascals (kPA) for each sample tested by Zone and the average result for each zone.

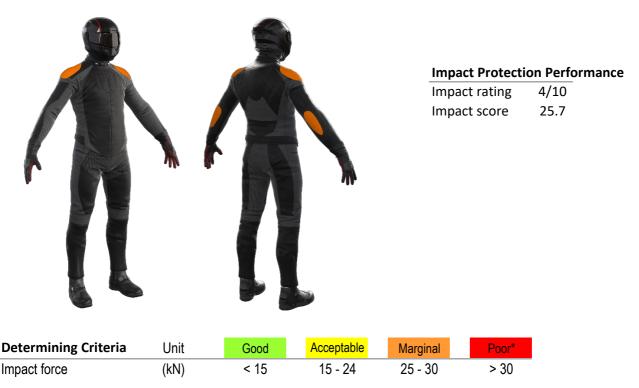

#### Burst pressure for each seam (kPA)

Area	Sample 1	Sample 2	Sample 3	Sample 4	Sample 5	Sample 6	Average	
Zones 1 & 2	1398	1123	1413	1345	1005	1343	1271	G
Zones 3 & 4	1114	659	1135	868	832	1173	963	Α

## **Impact Protection**

The jacket was tested for impact protection and coverage in accordance with MotoCAP test protocols. The diagram below is a visual indication of the likely performance of each impact protector calculated from the data in the table below. The colour coding is based on the worst performing score for average or maximum force for each impact zone. Areas shaded black are not considered for impact protection ratings.

\* Poor may also indicate that no impact protector, or impact protector pocket is present in the garment

**Individual Impact Protector Results:** - The table below shows the test results for each strike on each impact protector in kilonewtons (kN) and their area of coverage as a proportion (%) of the Zone. Individual strike results are capped at a maximum of 50kN.

Impact protector type	Elbow		Shoulder	
Average force (kN)	23.8	A	23.8 A	
Maximum force (kN)	27.1	Μ	27.1 M	
Coverage of Zone 1 area	70%		95%	
Coverage of Zone after displacement	70%		95%	

**Individual Impact Protector Results:** - The table below shows the test results for each strike on individual impact protectors in kilonewtons (kN) and the position of the strike. Individual strike results are capped at a maximum of 50kN.

### Force transfer for each impact strike (kN)

Impact protector type	Elbow			Shoulder		
Strike location	Centre	Mid	Edge	Centre	Mid	Edge
Impact Protector 1	24.9	22.3	27.1	24.9	22.3	27.1
Impact Protector 2	22.0	25.4	24.1	22.0	25.4	24.1
Impact Protector 3	20.9	22.6	24.8	20.9	22.6	24.8

## Breathability

The jacket was tested for breathability following the MotoCAP test protocols. The table below shows the moisture vapour resistance and the thermal resistance values obtained.

Without removable I	With water-resistant liner				
Breathability rating	7	Brea	thability rating	N/A	
Breathability score	0.109	Brea	thability score	N/A	
Moisture Vapour Resis	stance - R <sub>et</sub> (kPa.m <sup>2</sup> /W)	1	2	Average	
Without removable liner	S	145.9	140.1	143.0	
With water-resistant line	r	N/A	N/A	N/A	
Thermal Resistance - I	R <sub>ct</sub> (K.m²/W)	1	2	Average	
Without removable liner	S	0.256	0.263	0.260	
With water-resistant line	r	N/A	N/A	N/A	

## Water spray and rain resistance

This jacket is advertised as water-resistant, and so has been tested for water spray and rain resistance according to the MotoCAP test protocols. The table below shows the water absorbed (ml) and the wetting proportion (%) of the garment and undergarments due to water absorption.

	Water absorbe	ed by garment	Water absorbed by underwear		
	Volume (ml)	Percentage (%)	Volume (ml)	Percentage (%)	
Jacket 1	246	19%	85	29%	
Jacket 2	233	18%	64	23%	
Average	239	19%	75	26%	

#### Location of wetting

Major visible wetting to the cotton underwear was present at the chest and neck of both jackets tested.
